European Federation of Animal Science

WEBINAR SERIES

How to improve animal behaviour through breeding

EAAP has been delivering programs on animal science for over 70 years. After careful planning, we are this year going to provide some outstanding webinars by inviting top speakers who will introduce subjects related to animal science and livestock industry to scientists and technicians.

The Webinar series is planned to be organized monthly to inform, update, disseminate with high profile speakers the EAAP individual members. The EAAP Webinars will be held monthly, in the afternoon of the second Tuesday of the month.

The speakers are selected to offer to participants exclusive inside on the topics. With this 3rd EAAP Webinar we intend to first set the stage with a lecture offered by *Per Jensen*, Linköping University (Sweden) on **The domestication and behaviour in chickens**. This will be followed by a talk on **The impact of breeding on poultry behaviour with a special focus on measuring behaviour and improving activity and feather pecking** by *Esther Ellen*, Wageningen University and Research (the Netherlands). The last talk will be on **Breeding for pig behaviour to improve their health and welfare**, given by *Laurianne Canario*, INRAE (France).

By attending EAAP Webinars, you will be able to stay on top of the latest research and gain new inspiration. Connect and network through a range of interactive presentations, discussions and workshops. Get updates on the latest results and opinion about animal science and livestock industry. You can use this program also to teach your students.

Useful information:

What: EAAP Webinar

Title: How to improve animal behaviour through breeding

When: Tuesday, May 11th 2021, 13:00 - 15:00 Central European Time

Chair: Erling Strandberg (President EAAP Commission on Animal Genetics)

How to participate: EAAP will send a [link](#) to all its members. For the first webinars EAAP will disseminate the link for participating to non-members through socials, EAAP Newsletters and website.

The webinar will be further available only to EAAP individual members on the EAAP members restricted area.

More details on EAAP webinars and speakers will be soon available at the EAAP website.
